Academic Projects

Project 1: A Web Application: "Online Faculty Recruitment System"

Project Description: A web portal for the college to higher the faculties according to their requirement.

Technologies Used: Advance Java, JSP, MySQL Database, Glassfish server, HTML, CSS, JavaScript.

IDE used: NetBeans.

Responsibilities:

- An admin of the college can post the details of the vacancy in the college.
- A User panel where any user can upload their details for recruitment.
- Designed the database where the information of the user can be stored.

Project 2: An Android Application: "Daily Deeds"

Project Description: An app where the clients will register in app and select the services, they want for their housing needs like cleaning house, washing clothes, cleaning dishes, mopping, swiping etc. and will hire the employee.

Technologies Used: Android, Servlets, MySQL Database, Java, Glassfish server.

IDE used: NetBeans, Android Studio.

Responsibilities:

- An admin will add the deserving employee and show his profile on customer dashboard.
- The client will be able to hire the employee according to his needs.
- Authority of adding employee and remove employee will be in the hands of admin.

- Designed the database where the information of all (the employee and the customer) will be store.

Project 3: **A Web Application: "A photography website for Anand Studio"**

Project Description: Website for photography orders. Clients can visit the website and can see portfolios and clicks by him. Clients can see all the services provided by him like wedding photography, pre wedding shoots, videography, party / occasional shoots and all. If somebody wants to hire him, he can fill contact form. The data will store directly in database and I can check there who wants to hire him as their photographer.

Technologies Used: Java, servlets, MySQL Database, Glassfish server, HTML, CSS, JavaScript.

IDE used: NetBeans.

Responsibilities:

- If the clients want to book him, he has to fill the contact form given in website.
- Database is designed to store the client's details.
